

## The Math Miracle: Intentional or Coincidental?

Since the monumental discovery of the Quran's mathematical structure encoded to number '19' in 1974 by Dr. Rashad Khalifa people have claimed it to be a mere coincidence. They perform a cursory look over rather than a genuine investigation and come to the erroneous conclusion that any piece of literature could exhibit the 19-based math structure by simply writing a few more sentences until the quantity of alphabets reaches a multiple, any multiple, of 19. Ironically, unbeknownst to them, one of the key functions of 19 according to Sura 74, Verse 31 is to bring a person's true belief or disbelief in GOD to the surface. If a person does not truly believe GOD is real, any claim of a miraculous sign from GOD is immediately categorized as false. Miracles can only exist if GOD exists, so if you don't believe in GOD, by default, you can't believe in miracles and will never ever see one. Just take, for example, an Atheist scientist observing the irreducibly complex structure of the DNA molecule and concluding it came about by fluke, random changes over time, even though, it is far beyond any computer program code (i.e. Windows 10) we've ever created. Belief determines what we see and the 19-based mathematical miracle of the Quran is no different. For example, a comment Dr. Francis Crick - who does not believe in creation and thus, cannot see creation – said to his fellow biologists while observing the intricacies of DNA embodies this very well.

Biologists must constantly keep in mind that what they see was not designed, but rather evolved. — *Francis Crick (discovered DNA)*

Since its discovery, the depth of the math miracle is continually being unveiled. We know much more today than we did 45 years ago and the degree of complexity has increased exponentially. However, most people do not believe GOD exists and so they, literally, cannot see any miracle, let alone this one. The more math signs believers discover the more their faith strengthens, whereas the more signs hypocrites and disbelievers are shown the more disturbed they become. This article will share some math miracle connections in the Quran that directly addresses the 'coincidence' claim that all you need is to add another sentence or two until the letters equal a multiple, any multiple, of 19.

### FIXED, NOT ARBITRARY

The Quran is structured around the number '19' whereby suras, verses, gematrical values, certain Arabic letters, and important words, etc., are found in multiples of 19 throughout. However, sceptics have often made the claim the math miracle is a coincidence because all you need is to write enough sentences until the frequency of letters totals a multiple, any multiple, of 19. This begs the question, 'are there any other elements or components of the math structure that are fixed and unchangeable [not arbitrarily adjusted by the investigator 'making' connections] and directly linked to the number '19' in a way that makes it apparent the claim of chance coincidence is incorrect?' The answer is a definite 'yes' with prime and composite numbers. Others have looked at prime and composite numbers in the past. Indeed, some of their discoveries were awesome. Although, the parameters were sometimes confusing and, at times, appeared arbitrary. The observations herein are precisely the opposite – simple, easy to understand, without any arbitrary human-made parameters to 'make it work' but rather, parameters independent of human distortion. The parameters locked and fixed by mathematics itself.

A prime number is a number which is divisible by itself and 1, whereas a composite number has multiple factors. For example, 19 is a prime number. It is divisible by itself and 1 ( $19/19= 1$ ,  $19/1 = 19$ ). 10 is a composite number meaning it is divisible by multiple numbers (i.e.: 10 is divisible by 1, 2, 5, 10). All numbers are either prime or composite, but never both. Thus, prime numbers are well suited for encryptions because they do not have multiple factors. However, it is not prime numbers in general which are the focus of this article but the sequential order or index of prime and composite numbers.

The sequential order of prime and composite numbers is not arbitrary but fixed, unchangeable (see Table 1). These numbers cannot be in any other order, but locked in position.

- The 1st prime number is **2**, first composite is **4**.
- The 2nd prime number is **3**, 2nd composite is **6**.
- The 3rd prime number is **5**, 3rd composite is **8**.

Should they discover this, it would be irrefutable proof of a higher intelligence beyond our planet. In fact, this is precisely what the 1990's movie 'Contact' with Jodie Foster was all about. However, the mathematical miracle of the Quran is based on the number '19' according to the Quran itself (see 74:30). We see in Table 1 that the 19th sequences of prime and composite numbers are 67 and 30, respectively.

It is crucial to understand that the sequence or index of prime and composite numbers is fixed and impervious to human distortion. They cannot be changed to any other numbers. The 16th prime number will always be 53. The 19th prime will always be 67. The 19th composite will always be 30. These numbers will never change. There are no other numbers in existence besides prime number 67 and composite number 30 that have such a direct relationship with '19'.

If the Quran's 19-based mathematical code is coincidental and thereby not a real phenomena, then we would expect to find no correlation with the 19th prime (67) and composite (30). However, if the math miracle is real and intentionally mathematically structured around the number 19, then we would expect to find correlations with 67 and 30. Furthermore, given their deeply significant and undeniable association with 19, it is reasonable to expect them (67, 30) to show up in deeply significant areas of the math miracle [rather than minor anecdotal points].

It must be stressed that the mathematical probability of finding the 19-based structure amongst suras, verses, important words, Quranic initial frequencies, gematrical values, and strings of numbers by sheer chance is already proven to be statistically improbable. Although the mathematical probability of finding additional connections to the 19th prime (67) and 19th

composite (30) numbers at the same time is even more improbably by significant orders of magnitude. Should such connections exist the 'coincidence' claim is utterly refuted.

**The Connection:** I will list the more significant findings first. If you want to see more, I will put an appendix at the end of this document for additional findings.

**\*\*\*IMPORTANT:** *The significance of the 19th prime and 19th composite to the math miracle was first discovered in 2013 by Hasan Ozturk (see <http://hanif.de/index.php?p=2535>). Although, I discovered the 19, 30, 67 connection independently, I cannot take credit for first discovering it. As such, some of the findings below are from the above article link. **I will put an asterisk (\*) beside findings from him.** I strongly urge people to look at Hasan Ozturk's research in the above link as there are many more findings worth seeing. The remaining are extracted from the appendices of Quran: The Final Testament by Rashad Khalifa.*

### 19th Prime Number is 67

Prime; 2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, **67**

### 19th Composite Number is 30

Composite; 4, 6, 8, 9, 10, 12, 14, 15, 16, 18, 20, 21, 22, 24, 25, 26, 27, 28, **30**

1. Number **19** in Arabic (تسعة عشر) is found in verse **30** of sura 74

\*2. When we include verse numbers, number **19** is the **67th** occurrence of **19** from beginning of the Quran to 74:**30** where it is mention within the Quranic text.

**To summarize:** 19 is only mentioned in 74:30 but it is the 67th occurrence of '19' when sura and verse numbers are included. Right where 19 is mentioned in the Quran we have a direct link with the 19th prime (67) and the 19th composite (30). **\*\*Please Note:** there are 67 suras in the Quran that have a 30<sup>th</sup> verse.

3. From the first initialled sura [Sura 2 (ALM)] to the last initialled sura [Sura 68 (NuN)] there are 29 initialled suras. However, there are 30 initialled verses (sura 42 has two verses with initials). In other words, there are 30 initialled verses spread across 67 suras coded to the number 19

67 suras containing 30 initialled verses

3. Of the 67 suras, only 29 contain initial letters because Sura 42 has two verses with initials (42:1 - H.M, 42:2 - A.S.Q). This allows for another connection to 19 as there are 38 un-initialled suras between the suras with initials (67 - 29 = 38) which is 19×2.

4. The Arabic letter **Lam** (ل) is the only Arabic letter (and thus, the only Quranic initial) with a gematrical value equal to one of the three key numbers 19, 67, 30. In this case, **Lam** (ل) has a value of 30. Therefore, we would expect to find connections with 19 and 67.

\*5. There are 67 verses which end with Arabic letter **Lam** (ل). Note, gematrical value of the letter Lam (ل) is 30, thus both numbers are linked to number 19. As well, **Lam** (ل) being 30 is the **only** Arabic letter (and Quranic initial) with a gematrical value equal to one of these key numbers (19, 67, 30). Note, the sum of the 67 verse numbers add up to 2793 (19 x 147).

2:108, 3:3, 3:48, 3:173, 4:44, 5:12, 5:60, 5:77, 6:66, 6:102, 6:107, 7:105, 7:134, 9:38, 10:108, 11:12, 11:40, 12:66, 13:9, 13:11, 13:12, 13:13, 13:14, 13:15, 13:17, 14:31, 14:44, 14:45, 14:46, 15:74, 15:85, 24:36, 25:17, 26:17, 26:22, 26:59, 26:197, 28:22, 28:28, 32:23, 33:4, 34:16, 38:84, 39:41, 39:62, 40:11, 40:25, 40:50, 42:6, 42:41, 42:44, 42:46, 43:59, 56:41, 60:1, 69:44, 70:8, 73:1, 77:13, 77:14, 86:13, 86:14, 105:1, 105:2, 105:3, 105:4, 105:5 (sum is 2793)

27:93

وقل الحمد لله سيريكم آياته فتعرفونها وما ربك بغفل عما تعملون

And say, "Praise be to GOD; He will show you His proofs, until you recognize them. Your Lord is never unaware of anything you do."

\*6. Amazingly, if we count letter **Lam** (ل) among these 67 verses we will find a total of 568 Lams (ل) and the sum of the first 19 prime numbers is also 568. Digit sum; 5 + 6 + 8 = 19.

2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67 (sum is 568).

7. Sura 42:2 is unique, and therefore, special as it is the only sura with initials in the second verse. Thus, if the math miracle is real we would expect to find a connection of some sort with **30**, **67** or both.

Using the **Order of Revelation**. **Ayn, Saad, Qaf** in **42:2** was the **19th** set of initials revealed leaving 11 initial sets remaining. These **11** sets of initials consist of **30** initial letters (see Table 3). Furthermore, the frequency of A.S.Q in Sura 42:2 is 209 (**19 x 11**) [see Table A].

8. The last verse before the final set of initials (68:1 'NuN') is Sura **67**, Verse **30**.

9. **30** whole numbers are mentioned in the Quran and the sum of these numbers is a multiple of 19. When fractions are included there are **38** numbers mentioned in the Quran (**19 x 2**).

10. The missing Basmallah is found in the **30th** verse of Sura 27.

11. The word '**Salat**' occurs in the Quran **67** times. When we add the numbers of suras and verses of these **67** occurrences, the total comes to 4674, or **19 x 246** (see Appendix 1, AEVQ).

12. "The word "**Quran**" occurs in the Quran **58** times, with **one of them, in 10:15, referring to "another Quran."** This particular occurrence, therefore, must be excluded. Thus, the frequency of occurrence of "this Quran" in the Quran is **57**, or **19 x 3**. Two other grammatical forms of the word "Quran" occur in **12 verses**. These include the word "**Quranun**" and the word "**Quranahu**." One of these occurrences, in 13:31 refers to "**another Quran**" that cause the mountains to crumble. Another occurrence, in 41:44, refers to "a non-Arabic Quran." These two occurrences, therefore, are excluded.  
(from AEVQ, appendix 1)"

Therefore, the '**Quran**' in all its grammatical forms is mentioned 70 times, but 3 do not refer to God's Quran and must be excluded. Therefore, the 'Quran', this Quran, is mentioned **67** times (70 - 3 = 67).

13. **19:30**, using the Order of Revelation, is the **114th** verse (**19 x 6**) containing the word '**Allah**' (GOD).

\*14 From chapter **30** to **67** there are **1862** (**19 x 98**) verses. Remarkably, chapter **19**, "Mary" consists of precisely **98** verses.

**\*15** From chapter **19** to **67** there are **3021** (**19 x 159**) verses. Glory is to God; we know that verse 15:9 describes the preservation of the Quran. Thus, verse 15:9 is pointing directly to the mathematical miracle of nineteen.

**\*16** Consider until chapter **19** all verse numbers **67**, in such condition there are total 16 verses in which Arabic letter Lam (ل) occurs 113 times and we know number 113 is precisely **30th** prime number.

2:67, 3:67, 4:67, 5:67, 6:67, 7:67, 8:67, 9:67, 10:67, 11:67, 12:67, 15:67, 16:67, 17:67, 18:67, 19:67

2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67, 71, 73, 79, 83, 89, 97, 101, 103, 107, 109, 113

**\*17.** Consider until chapter **19** all verse numbers **67**, in such condition there are total 16 verses, the sum of these 16 verse numbers is **1072**. Please note letter Qaf (ق) which is **19th** letter in gematrical value system placed first in verse 1:6, gematrical value of this verse is incredibly **1072**.

**\*18.** Consider all verse numbers **67** in initial section. In such condition, there are total 17 verses. The frequency of the letter Qaf (ق) which is **19th** letter in gematrical value system amazingly is **19**.

2:67, 3:67, 7:67, 10:67, 11:67, 12:67, 15:67, 19:67, 20:67, 26:67, 27:67, 28:67, 29:67, 36:67, 38:67, 40:67, 43:67

**\*19.** Number **67** is gematrical value of the Arabic expression "Clear Proof" (بينة), if we calculate this word with the article then gematrical value will be **98** and the title of chapter **98** is "The Clear Proof" (البينة). Consider chapter **67** to 98 the frequency of the word God, in such criteria we have **19** chapters, **42** verses and **53** occurrences. **19 + 42 + 53 = 114** (**19 x 6**). By adding chapter and verse numbers we get, 2220 (**74 x 30**). Number **19**, the clear proof of the Quran is placed in verse **74:30**.

67:9, 67:26, 67:28, 69:33, 70:3, 71:3, 71:4, 71:13, 71:15, 71:17, 71:19, 71:25, 72:4, 72:5, 72:7, 72:12, 72:18, 72:19, 72:22, 72:23, 73:20, 74:31, 74:56, 76:6, 76:9, 76:11, 76:30, 79:25, 81:29, 82:19, 84:23, 85:8, 85:9, 85:20, 87:7, 88:24, 91:13, 95:8, 96:14, 98:2, 98:5, 98:8

\*20. Chapter 98 end without exception with the Arabic letter Ha (هـ). From chapter 98 to end of chapter 114, both chapters inclusive the frequency of the letter Ha (هـ) occurs among 67 verses precisely 114 (19 \* 6) times.

98:1, 98:2, 98:3, 98:4, 98:5, 98:6, 98:7, 98:8, 99:1, 99:2, 99:3, 99:4, 99:5, 99:6, 99:7, 99:8, 100:4, 100:5, 100:6, 100:7, 100:8, 100:11, 101:1, 101:2, 101:3, 101:5, 101:6, 101:7, 101:8, 101:9, 101:10, 101:11, 102:1, 102:7, 104:1, 104:2, 104:3, 104:4, 104:5, 104:6, 104:7, 104:8, 104:9, 105:2, 105:3, 105:4, 105:5, 106:2, 106:3, 106:4, 107:5, 107:6, 108:3, 109:1, 110:1, 110:2, 110:3, 111:1, 111:2, 111:3, 111:4, 111:5, 112:1, 112:2, 112:4, 114:3, 114:6

98:3	فيها كتب قيمة
98:4	وما تفرق الذين أوتوا الكتب إلا من بعد ما جاءتهم البينة
98:5	وما أمروا إلا ليعبدوا الله مخلصين له الدين حنفاء ويقيموا الصلوة ويؤتوا الزكوة وذلك دين القيمة
98:6	إن الذين كفروا من أهل الكتب والمشركين في نار جهنم خالدين فيها أولئك هم شر البرية
98:7	إن الذين آمنوا وعملوا الصلحت أولئك هم خير البرية
98:8	جزاؤهم عند ربهم جنت عدن تجري من تحتها الأنهر خالدين فيها أبدا رضي الله عنهم ورضوا عنه ذلك لمن خشي ربه

\*22. Number 67 is the 19th prime number, from sura 19 (19:1) to the end of Quran (114:6) there are 67 chapters in which the word GOD (الله) occurs 1099 times (1 + 0 + 9 + 9 = 19).

19:30, 19:35, 19:36, 19:48, 19:49, 19:58, 19:76, 19:81, 20:8, 20:14, 20:61, 20:73, 20:98, 20:114, 21:22, 21:57, 21:66, 21:67, 21:98, 22:2, 22:3, 22:6, 22:7, 22:8, 22:9, 22:10, 22:11, 22:12, 22:14, 22:15, 22:16, 22:17, 22:18, 22:23, 22:25, 22:28, 22:30, 22:31, 22:32, 22:34, 22:35, 22:36, 22:37, 22:38, 22:39, 22:40, 22:41, 22:47, 22:52, 22:54, 22:56, 22:58, 22:59, 22:60, 22:61, 22:62, 22:63, 22:64, 22:65, 22:68, 22:69, 22:70, 22:71, 22:72, 22:73, 22:74, 22:75, 22:76, 22:78, 23:14, 23:23, 23:24, 23:28, 23:32, 23:38, 23:85, 23:87, 23:89, 23:91, 23:116, 23:117, 24:2, 24:5, 24:6, 24:7, 24:8, 24:9, 24:10, 24:13, 24:14, 24:15, 24:17, 24:18, 24:19, 24:20, 24:21, 24:22, 24:25, 24:28, 24:29, 24:30, 24:31, 24:32, 24:33, 24:35, 24:36, 24:37, 24:38, 24:39, 24:40, 24:41, 24:42, 24:43, 24:44, 24:45, 24:46, 24:47, 24:48, 24:50, 24:51, 24:52, 24:53,

**\*22.** Consider all verses comprised of **19** Arabic words and contain the word "God", in Arabic (الله). In such criteria we will find **30** chapters and 66 verses. We know number 66 is identical to the gematrinal value of the word God, in Arabic (الله). Furthermore, the sum of the **30** chapter numbers yield **786**. First verse (1:1) and opening of the Quran, called Basmalah is the foundation of the mathematical system and gematrinal value of this **19**-lettered sentence is **786**.

2:19, 2:75, 2:106, 2:137, 2:148, 3:50, 3:66, 3:99, 3:151, 3:170, 4:33, 4:142, 5:7, 5:40, 5:71, 5:80, 5:105, 6:37, 6:159, 7:26, 7:87, 7:164, 8:44, 9:59, 9:67, 9:93, 10:60, 13:13, 13:27, 14:4, 16:28, 16:77, 16:94, 18:16, 18:39, 24:37, 24:59, 26:227, 27:64, 28:30, 28:71,

\*23. 19th odd number is 37 (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37). If we count the verses in these chapters (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37), we get;  $7 + 200 + 120 + 206 + 127 + 123 + 43 + 99 + 111 + 98 + 112 + 118 + 77 + 93 + 69 + 34 + 73 + 45 + 182 = 1937$ .

### 9:128 - 129: The False Verses

- 9:128-129 are proven to be falsely injected into the Quran making 9:127 the true end of Sura 9. There are numerous mathematical proofs but few noticed the significance of three proofs below from appendix 24 from the AEVQ.

Table 4: All suras which contain a verse number '129'

<b>Total: 114</b>	<b>1161</b>
$114 + 1161 - 2 = 1273$ or $19 \times 67$	

24. "[ 3 ] As shown at the end of Sura 9 in this translation, the total occurrence of the word "God" to the end of Sura 9 is **1273**,  $19 \times 67$ . If the false injections 9:128-129 were included, the total would have become 1274, not a multiple of 19."

25. "[ 43 ] Assuming that Sura 9 consists of 129 verses, let us look at all the suras that contain a verse No. 129. This means that we look at all the suras that consist of 129 or more verses. For example, Sura 2 consists of 286 verses. Therefore, it contains a verse that is assigned the number "129." We then take this verse and add it to all the other verses assigned the number 129 throughout the Quran. Under this assumption, there are 9 suras that contain a verse No. 129. Interestingly, we find that the total of sura numbers of these 9 suras is a multiple of 19 (114), while the total for the nine 129's can be a multiple of 19 if 2 is deducted from their total. In other words, we are told that one of these 9 suras contains 2 extra verses.

When we add 114, plus 1161, and remove 2, we get **1273**, or  $19 \times 67$ . Compare this total (1273) with the total reported in the Item 44 below. Of the 9 suras listed in Table 4, which one has the extra 2 verses?"

26. "[ 44 ] To pinpoint the location of these two false verses, let us look at all the suras that contain a verse No. 128, while continuing to assume that Sura 9 consists of 129 verses. This will give us the same list of suras as in Table 4, and also bring in Sura 16 which has precisely 128 verses.

As shown in Table 5, Sura 9 stands out in glaring disharmony; it is singled out as the sura that contains the false verses. The total of suras and verses becomes divisible by 19 **only** if Sura 9 is removed. Note that the divisible total, after removing Sura 9, is **1273**,  $19 \times 67$ , which is the same total obtained in Item 43 above after removing 2 verses.

<b>Total: 130</b>	<b>1280</b>
(130 + 1280 = 1410 not a multiple of 19) If we remove Sura 9, with its 128 verses, we get $1410 - 9 - 128 = 1273 = 19 \times 67$	

This remarkable phenomenon proves that Sura 9 could not contain a verse No. 128.”

**27.** *\*\*The following observation is not related to 67 or 30 but is significant as it is further confirmation Sura 9 has 127 verses.* The 4 words of the Bismillah are mentioned a total of **2888** times (**19** x **19** x 8) in the Qur'an. Sura 9 is the only sura that doesn't have the 'bismillah' and yet there is an interesting connection with **2888**. The total number of words in sura 9, assuming 127 verses, is **2469**. The **2469th** composite number is **2888**, as if to say these 127 verses containing **2469** words are truly 'in the name of GOD, most Gracious, Most Merciful' (see Table 6).

**28.** Total sum of all H.M initial counts is 2147 (19 x 113). 113 is the **30th** prime number.

**End of the World:**

As we know the 'seven pairs' are the 14 different sets of Quranic initials spanning **30** initialled verses. The gematrical value of all 14 Quranic initials is **1709**, which is the number of lunar years the earth will survive from the time the prophecy was stated in the Quran. Since **19**, the **19th** prime (**67**) and composite (**30**) numbers play a significant role with the Quran's math miracle, it would not be unexpected to find a connection between prime and composite numbers and the end of the world.

<b>267</b>	<b>1709</b>

The 267th Prime number is **1709**

**29.** The first prime number is 2, which happens to be the first initialled sura, and the **19th** prime number is **67**. If we concatenate these numbers together we get **267**. The **267th** prime number is **1709** (Table 9).

**30.** Between the first prime number (2) and the **19th** prime number (**67**) there are 47 composite numbers. The sum of these **composite numbers** is **1709** (see Table 10).

**31.** **20:15** states "The Hour (End of the World) is surely coming, I will keep it **almost hidden**. For each soul must be paid for its works." If we concatenate the sura (20) and verse (15)

The **1709th** composite number is 2015

together we get 2015. **2015** is the **1709th** composite number (see Table 11). Table 11 is essentially Table 10 extended to the composite number 2015.

## Conclusion:

There can be no doubt; the miracle of **19** is not coincidental but a real, intentional mathematical structure. **19**, the **19th** prime (**67**) and composite (**30**) numbers are three numbers that are intricately linked. There are no other numbers in the mathematical universe that are closer to **19** than **67** and **30** and we find these numbers associated with major areas of the math miracle, such as:

- **19** itself is mentioned in 74:**30** which is the **67th** occurrence of **19** [when sura/verse numbers are included].
- **30** initialled verses are spread across **67** suras coded around **19**.
- Many connections with the Quranic initial with a gematrical value of **30**, Lam (ل).
- 42:2 is the only place with initials in the second verse, and it was the **19th** set of initials revealed [*in order of revelation*] with **30** individual initials left to come.
- **67:30** is the final verse before the initials finish in 68:1 N, N.
- Only **30** whole numbers are found in the Quran.
- The missing Bismillah is found in verse **30** (27:30).
- 'Salat' is mentioned **67** times in the Quran.
- The 'Quran' in all its grammatical forms is mentioned **67** times.
- The false verses – 'Allah' is mentioned **19** x **67** times from 1:1 to 9:127
- The false verses – The sum of all suras with a verse number 128, excluding 9:128, equals **19** x **67**.
- The total H.M. counts in all 7 H.M. suras is 2147 (**19** x **113**). **113** is the **30th prime** number.
- Multiple connections with the end of the world, such as the sum of composite numbers up to the **19th prime number (67)** equalling **1709** (*the sum of the 7 pairs*), the 1709th composite number being 2015 and Sura 20:15 is where GOD says the end of the world is "**almost hidden.**"

There is no doubt that **19**, the 19th prime number **67** and the 19th composite number **30** are intricately connected to the 19-based math miracle in the Quran as we find them in key areas. The probability of finding a multiple, any multiple, of **19** in the Quran arising by chance is already incredibly improbable. However, when we factor in the additional parameter of the 30 and 67 and finding multiples directly connected to them in crucial areas, the probability of the Quran's math miracle being a coincidence is utterly impossible many times over.
